P-SQUARE SOLUTIONS

Solution Delivery Partner.

Intelligent Transportation System Solutions

Tel: 856-123-1234

PROFILE

Company

P-Square was established in 2005 in New Jersey by team of professionals with experience in Intelligent transportation Systems to provide back office solutions to one of major toll systems project integrator in the toll industry.

Over past four years the list of clients & projects have grown rapidly where P-Square has provided customized back office solutions.

Our Mission

"To provide turnkey Back Office Solutions and Support for various segments in Transportation Industry using latest technologies and seamless integration to their current operations".

P-Square is solution delivery partner for various clients in Tolls & Traffic Management segments and provide customize back office integration and implementation based on specific client requirements.

Experience

At P-square, we have niche expertise and more than 25 yrs of combined experience in Tolls & Traffic Management and has delivered software solutions to various clients.

Our business experience in all aspects of toll projects implementation and delivery combined with strong technological background has uniquely placed us to come up with new ideas, use modular approach and keep it open and simple to use from client's prospective while developing products.

Products

Our current back-office product offering involves the following functional modules:

- Transaction Management
- Core Financials
- Payment Processing
- Inter-operability
- Invoicing/

Mailing

- DMV Interface
- PayPal Integration

Technology

We have provided solutions with various technologies and their configurations.

Our experience include the Main Frame systems, Client/Server based systems and currently thin client (web based) system.

We have expertise in handling major OS (UNIX, LINUX, WINDOWS) and Databases (ORACLE, INFORMIX & SQL SERVER).

We have experience in implementing J2EE.NET projects also.
